

Dear President-Elect Trump:

January 15, 2025

Imagine you're a fourth-generation family farmer, devoted to growing food for Americans. Finding domestic workers for labor-intensive crops is nearly impossible, making H-2A guestworkers essential for planting, tending and harvesting fruits and vegetables.

Yet, current federal labor laws require farmers to pay these guestworkers an Adverse Effect Wage Rate (AEWR) that's significantly higher than state minimum wages in our region. For Michigan farmers, that's \$18.15 an hour in 2025, in addition to providing housing and transportation at no cost to the guestworker which drives all-in compensation to over \$30 per hour. These rising expenses are forcing local growers out of business.

Farming is more than a job; it's a way of life and the backbone of our nation's food security. But if policies don't change, this way of life is at risk, as is our ability to produce fruits and vegetables on U.S. soil.

We call on you to take action to preserve fruit and vegetable production on U.S. soil and protect America's food supply by:

- 1. Adjusting AEWR to Reflect Fair, Sustainable Wages:** Implement a more realistic wage structure for H-2A guestworkers, supporting growers and preventing industry collapse.
- 2. Ensuring Affordable, Safe Food for American Consumers:** Without changes, increased imports will drive up costs for consumers and reduce our control over food safety and quality. U.S. grown produce meets the highest standards; losing it would jeopardize the health of all consumers.
- 3. Strengthening Domestic Food Security:** Local food production is reliable and resilient, especially during global disruptions. We must safeguard our food system by keeping farms operational.
- 4. Modernize and Maintain the H-2A Guestworker Program:** This guestworker program is critical to U.S. food production because of the lack of domestic workers willing to work on farms. It needs to be updated to reflect changes that have occurred in the U.S. over the past 40 years.

Farmers are ready to continue feeding their communities, but they need policies that support them.
